

E, A, B Minor Chords Summary

By Christopher Schlegel

Congratulations on making it through all that chord practice!

If you had trouble with any group of chords, or any particular chord change, or the up tempo versions, then I strongly suggest you return to that lesson and make sure you take the time to work on it and get it right. It is extremely important to get these basic, fundamental skills right early on in your learning and practicing. We want to avoid learning any bad habits at the beginning that we will have to un-learn later on and then re-learn the right way.

Even if it takes a little longer to get right, it's best to take that extra time to get it right the first time.

Practice those chord changes! Happy learning and playing.

Practicing Chords Series 1
