CAPABILITY

IS A SKILL

CAN BE LEARNED

“Tools extend man’s abilities. Thinking tools extend man’s ability to brainstorm innovative solutions.”

In the center, there is a 3D illustration of a human brain with different lobes colored in blue, yellow, green, and red. Below the brain, the text 'Achieve Goals Overcome Challenges Solve Problems' is written in a white, bold, sans-serif font. At the bottom, there are two purple buttons with white text: 'START' and 'CONTINUE'. The background features faint, white icons of a cube, a lightbulb, and a plus sign.

PROBLEM

THE PHOENIX CHECKLIST

Phoenix checklist

The Phoenix Checklist is a set of questions developed by the CIA to encourage agents to look at a challenge from multiple perspectives. Select questions from this list that are relevant to your needs and brainstorm answers to them. Note your thoughts in the space provided. Also, feel free to add any intriguing and thought-provoking questions you come across to this list. Remember: better creative solutions come from asking better questions!

The Problem

Why is it necessary to solve the problem?

What benefits will you gain by solving the problem?

What is the unknown?

What is it you don't yet understand?

What is the information?

What isn't the problem?

Is the information sufficient?

Or is it insufficient?

Or redundant?

Or contradictory?

The Plan

Can you solve the whole problem? Part of the problem?

What would you like the resolution to be?

Can you picture it?

How much of the unknown can you determine?

Can you derive something useful from the information you have?

Have you used all the information?

Have you taken into account all essential notions in the problem?

Can you separate the steps in the problem-solving process?

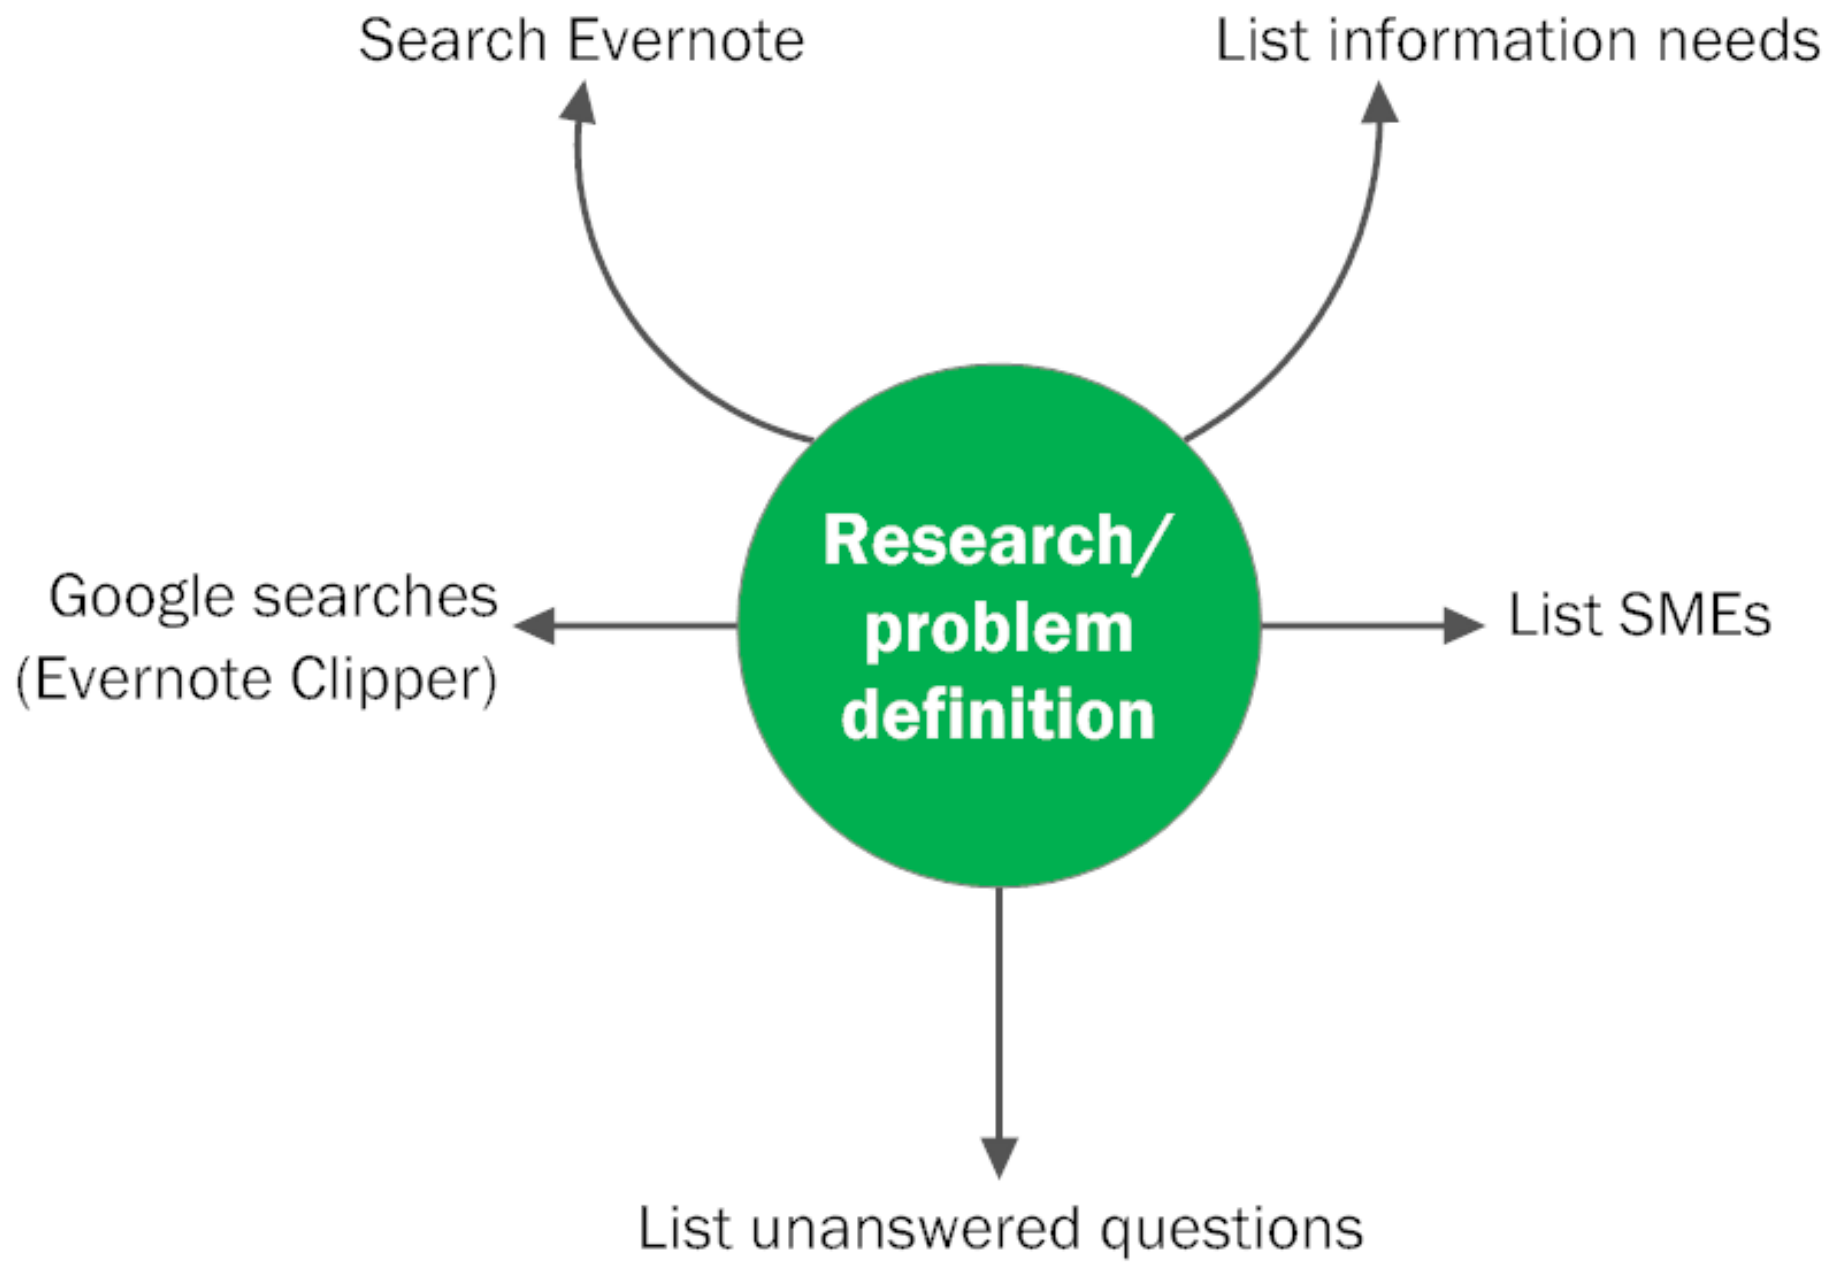

Can you determine the correctness of each step?

What creative-thinking techniques can you use to generate ideas?

How many different techniques?

Can you see the result?

INSTRUCTIONS

1. List ALL possible attributes in a column under each characteristic
2. Select one item from each column to create random combinations
3. Write down and brainstorm further about those that look most promising

Morphological Analysis

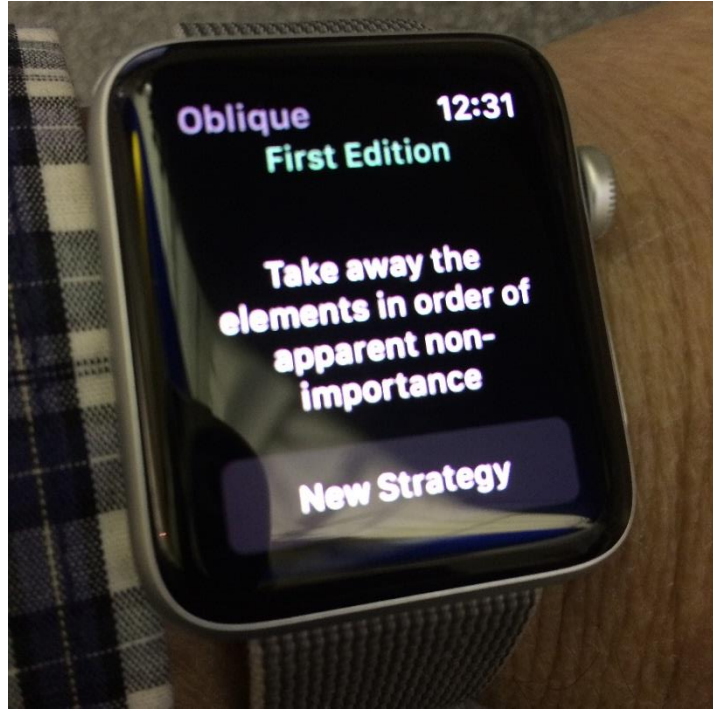

1. Take a spreadsheet and list the attributes or characteristics of the product or item that you want to brainstorm about, one per column at the top of the spreadsheet.
 2. Next, list in the appropriate column the different variations that are possible for that characteristic, one per cell. Repeat this process for the remaining characteristics. Try to list as many variations of each attribute as possible.
 3. To use this chart for brainstorming, randomly select one item from each column, and be sure to record any combinations that appear to be promising product ideas. Repeat this random selection process multiple times for best results.

Creative challenge

- Pick a challenge or problem you now face.
- Type it in a single sentence into a new Evernote note.
- Add several sentences that capture the essence of it.
- Use the techniques we've talked about to brainstorm ideas to solve it. Capture them in Evernote.

HAPPY IDEA HUNTING!

Thank you!
